Milestone Asset: First 1000 Users

Milestone Overview

Name of Milestone: First 1000 Users

Budget: ₦3,500,000.00

Duration: 90 days

Description

We have a projected plan to reach 1000 users before the end of the 2026 and plan to achieve this by institutional integration. To achieve this target, our backend servers have to be scaled to be able to handle that amount of user. Subsequently, next year, as we get more institutional customers, we plan to continue scaling our servers

Expected Deliverables

- 1. Horizontally and Vertically scaling our cloud infrastructure (e.g., AWS EC2 Auto Scaling, RDS).
- 2. Successful acquisition and onboarding of 1,000 active users via institutional channels by year-end 2026.
- 3. Server stress-test reports and uptime metrics validating capacity for current and future growth.
